• MODULE FEATURES

High efficiency

TOPCon technology improves efficiency, increases power generation, and contributes to lower LCOE.

Lower heat spot risk

Innovative circuit design and “Half Cell” structure decrease the temperature of heat spots and effectively reduce power loss.

Excellent low-light performance

Reliable performance in low-light conditions such as in the morning, at dusk or during raining days.

Resilient to extreme weather

Carefully selected materials ensure the module still works well under the condition of 2400Pa wind load and 5400Pa snow load.

PID resistant

High quality solar cell and advanced processing technology contribute to excellent PID resistance performance.

Double-sided electricity generation

Power can be generated on both sides to support additional output gains of up to 25%. The multi-busbar half-cut technology can boost energy density to deliver higher output.
