

UISOLAR balcony solar mounting system is a structure designed to support solar panels on balconies or terraces of buildings. They maximize space utilization, are easy to install, and often adjustable for optimal sunlight exposure. These systems are modular, safe, and aesthetically pleasing, offering a way to generate renewable energy in limited space environments.

Type 1

Technical Data

Mount type :	Balcony Solar Mounting System
Applicable site :	Balcony
Module type :	Framed
Module orientation :	Landscape
Max.wind load :	60m/s
Max.snow load :	2kn/m2
Material :	Aluminum 6005-T5 & SUS 304
Tilt angle :	0-60 degrees
Color :	Silver / black / customized color
Warranty :	10 years

Type 2
